

Summer Math Enrichment for 6th-8th Grade

The one area that will greatly help your child in Middle School as we dive into deeper multi step problems is being very fluent in all 4 operations math facts. The students will be expected to pass all 4 levels of Imagine Math (Big Brainz) by the end of April.

For this summer please have your child do at least 40 minutes of math facts a week.

Suggested ideas:

1. Big Brainz (good until end of June)
2. Verbally quizzing your child
3. Flash Cards
4. Other websites that have fact games such as:

Number munchers

https://archive.org/details/msdos_Number_Munchers_1990

Math Playground

https://www.mathplayground.com/ASB_In

Fact Monster

<https://www.factmonster.com/math/flashcards>

Please complete the attached paper and turn it into Mrs. Menicucci
** For the method used if it was a website please tell me which one so I know what your child found to be most helpful to continue that in the classroom when time permits. If it is one of the three I suggested, you may just use the title in black.*

Summer Math Enrichment for 6th-8th Grade

Name: _____ Grade: _____

Week	Method used	Parent signature
7-11 to 7-15		
7-18 to 7-22		
7-25 to 7-29		
8-1 to 8-5
